

## How to Measure Your Chaise

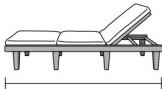

Before you order your cover, you will need to carefully measure the chaise it is meant to cover. Our guide below will walk you through the steps to correctly and accurately measure your chaise to ensure you get the best fit.

### Width

Measure the widest side of the chaise from left to right.

\*Start measurement at the front leg base or back wheel, whichever is the widest point.

### Depth

Measure the deepest side, adjacent to the width, of the chaise from left to right.

\*Measure from the front leg base to the back leg or wheel, whichever is the deepest point.

### Height

Measure from the ground to the top of the upright chaise.

\*We recommend a cover 1-2 inches shorter than the furniture for breathability.

Please round up your dimensions to the nearest inch.

**Please note:** Published dimensions for patio furniture cover styles refer to furniture dimensions

### Additional Tips

Each cover is intuitively designed to allow for hem-to-ground space for necessary air circulation

If no chaise cover with your dimensions exists, choose one that is slightly larger in width or depth
