

How to Measure Your Sectional

Before you order your cover, you will need to carefully measure the sectional it is meant to cover. Our guide below will walk you through the steps to correctly and accurately measure your sectional to ensure you get the best fit.

Width

Measure the widest side of the sofa from left to right.

*Start measurement at the leg base or arms, whichever is the widest point.

Depth

Measure the deepest side, adjacent to the width, from the back to front of the sofa.

*Start measurement at the top or bottom of the sofa/love seat back; if the furniture has a curvature design.

Height

Measure from the ground to the top of the sofa.

*We recommend a cover 1-2 inches shorter than the furniture for breathability.

Please round up your dimensions to the nearest inch.

Please note: Published dimensions for patio furniture cover styles refer to furniture dimensions

Additional Tips

Each cover is intuitively designed to allow for hem-to-ground space for necessary air circulation

If no sectional cover with your dimensions exists, choose one that is slightly larger in width or depth
