

How to Measure Your Umbrella

Before you order your cover, you will need to carefully measure the umbrella it is meant to cover. Our guide below will walk you through the steps to correctly and accurately measure your umbrella to ensure you get the best fit.

Circumference

Measure around the widest point of the collapsed umbrella.

Height

While the umbrella is closed, measure from the lowest part of the fabric, to the very top

Please round up your dimensions to the nearest inch.

Please note: Published dimensions for patio furniture cover styles refer to furniture dimensions

Additional Tips

If no umbrella cover with your exact dimensions exists, choose one that is slightly larger in circumference and height

In cold climates, cover and store your umbrella in a clean, dry location for maximum protection
